

11 September 1985

NOTE FOR: Executive Secretary PROM: Chief, Political Instability Branch, OGI Dick Kerr asked me last night to pull together a quick list of alternative analyses or unconventional papers prepared by the DI and the NIC over the past year or so in support of a presentation the DCI plans to make to PFIAB. Here goes: Scenarios of Dramatic Political Change This series of papers was requested by the DCI and seeks to identify the individuals and groups that might be able to seize power and the circumstances that could impel or impede such attempts. The Political Instability branch has produced a dozen of these studies over the past year and a half (see attached map); New Art Form for Intelligence Memoranda This series was initiated at the DCI's request in early 1985. The papers are intended to provide the policymaker with a structured way of thinking about the costs and opportunities associated with pursuing various policy options. I drafted prototype papers undisseminated typescript memoranda, Impact of Alternative US Strategies" was produced by a Special Working Group that I chaired. This very sensitive series of papers assesses the vulnerability of selected countries to external military, economic, and/or political pressure. The NIC published four papers in this series in 1983 Dissemination was very
